L. 9. The ναυίχοι, who here pay 31 + dr. paid 33 1/3 dr. in 408 the only year for which we have any record of their quota (S. G. 1242) and this

leads us to restore the same amount here, for there seem to be traces of a hasta after the +. In the somewhat defaced inscription relating to the tribute of 408 or 407-6 (S. G. 1258), inscribed on the side of i 251) they paid some amount of which the second figure was 4, after which there is room for only two figures before the beginning of the name: this was probably 31 dr., which suggests that they were still assessed at 2000 dr. but failed to pay their tribute in full ($\frac{1}{6}$ of 2000 dr. = 333 $\frac{1}{3}$ dr.)

[illegible]

The Agosnouvion pay here 26 dr. In 438 (S. Ep. i 242) they ~~had~~ apparently paid $33\frac{1}{3}$ dr. (Kirchhoff's restoration of . . . + 11) and in S. Ep. i 258 they paid ΔΑΤΤ i.e. 22 dr. though possibly another Δ is missing at the beginning of the sum

The Kayy epiboi who here pay [Δ] ΓΤΤ [ΙΙΙ] had paid the same amount in 437 and 436 (S. Ep. i 243, 244) but otherwise we have no record of the 12 payments.

The Sapaitoi who are a Thracian people, in-
lign the four preceding ones, who are all Hel-
lespontine, pay 25 sp. There are clear traces of a
 Δ before the Γ and there is room for ano-
ther figure before that. $[\Delta\Delta]\Gamma$ is presumably
correct, for they are known to have paid that sum
on previous occasions (437, 436, and 434(?) Δ). 421
their contribution is only $\frac{1}{2}$ dr. a surprising drop
of Σαπαιοί, θρεκίλον γαρ, ἧς ὁ νόμος ἡρώων

The figure representing the sum paid by the A-
gyptoi on this occasion is unfortunately lost. They
appear together with the *taxes* *egyptiar* and *taxa*
païor as *logos* *ex* *taxo* *païor* in 437 and 436,
and may be, I think, safely restored under
the same heading in S. G. 1253 (date uncer-

tain but ca. 434) as paying in each case 100 dr.
It is not unnatural to restore them here also,
as paying the same amount.
