

A

We find a reference in Xenophon to a petty dynast named Teres under Scythas and Metocus ruling the Thracian Delta, a district near Byzantium.

There is one name that we have been unable to fit into the outline. A Teres also used the reverse type of Maroneia, somewhat similar to that which Amadocus took over.

Just what a ruler of this district (τῷ Δέλτα) had to do with Maroneia is not clear. But Höck's suggestion is possible, viz., that Teres was driven from his throne at the same time that the territory east of the Hebrus River belonging to Maesades revolted and was separated from the Odrystian Empire. If so, he probably took refuge in Maroneia, then or later, and sought the support of Ma-
AKAΔHMI

Schaefer's conjecture based partly on a statement of Theopompus as to the longevity of an Odrystian king Teres, that the Teres of Xenophon lived to the ripe old age of 92 years and was the man mentioned in Philip's letter, is as reasonable as Höck's hypotheses. A Teres son of Cersobleptes is known from Ditt., 356 B.C. contemporary with Amadocus B. It is extremely improbable that this Teres is the man mentioned in Philip's letter.

The discovery of the Delphian inscription caused Höck to withdraw his first suggestion as to the identity of Teres.
 ὁ ἄνθρωπος τῆς ἐπιγραφῆς. Noriske inclined to identify him with Teres, son of Cersobleptes.
