periodicities in the spectrum of the

annual variation of the mean annual

temperature in the Northern Hemisphere

and the Southern Hemisphere.

The results of the present study

are summarized in Table I, in which

the values of the correlation coefficient

and the value of the correlation coeffi-

cients are given for each of the four

periods of the annual cycle.

The results of the present study

et la rentabilité des zones logistiques, exprimée par la valeur de l'exploitation des zones aussi bien que des zones industrielles et commerciales.

Il est à noter que les zones industrielles et commerciales sont en effet des zones qui ont une forte activité économique et qui sont donc très rentables pour les entreprises qui y sont installées.
