

Sir:-

Help for Greek Thrace!

ΑΚΑΔΗΜΙΑ

ΑΘΗΝΩΝ

Greece, who render such services to the human race, after a long and arduous struggle under the Turkish yoke, through the help and sympathy of the noble classes in the United States, succeeded in obtaining, in 1821, the national independence of a small portion only of the lands, inhabited by Greeks. We, however, that a new birth to downtrodden peoples of Europe is promised by your noble President and citizens of world, Mr. Wilson, we are led to hold to the unshakable belief, that we, in Thrace, shall obtain our national freedom and our union with mother Greece, which is the only just solution for our beloved land, that underwent and is undergoing, such unheard of cruelties and persecutions from the bloodstained Bulgars and the cruel Turk, barbarities that officially have been vouched by international commissions, by con-

sub, professors, etc.

The Greeks never since their independent nation-
life ceased to be thankful to those that helped
shotsover manue.

Therefore now, more than ever, hast to the free-
loving sentiments of President Wilson, the American
nate and the general public in the United Sta-
the land of Washington, Franklin and Lincoln, for
most valuable help, which alone will free us from
most inhuman and barbarous despotisms, that ever
disgraced the soil.

AKAΔHMIA

AOHNΩN

We do not seek it, nor conquests, but the in-
habited, from the whole of Greece, where
whose whole centuries have been unable to change
racial aspect of land, which is absolutely Greek
and where neither Bulgar nor Turk succeeded in caus-
any effect.

Since the fall of Constantinople, for over 500 y. we
never have we ceased to aspire for our freedom and
we are determined, Mr. Editor, men and women, young
and old, to shed our last drop of blood to attain
our national aspirations and hast to the United
States, which in the past had not taken sides in the
quarrels of Europe but thought their imperative du-
ty, in the present war of throwing their most valour

help in shaking off the yoke from the downtrodden
 poles of Europe, that they will assist us wholeheartedly in
 winning our national freedom.

Trusting most earnestly, Mr. Editor, that you will continue
 through the columns of your eminent and liberty-loving
 paper to advocate, as in the past, our rights for a free
 life and the union with our fatherland Greece.

We remain

Yours very respectfully
